Abstract

A shopping trolley (1) with a basket (2) includes a small-item tray (13) fixed to the inside (4) of its end wall (3). The end wall (3) of the shopping trolley, starting from its upper edge (7), has an indentation (11) on which the small-item tray (13) is supported, and in that a clamping strip (20) is provided for closing the indentation (11) and for additionally securing the small-item tray (13).
